

SUPT Addendum: Toroidal Coupling, Phase-Locked Lattices & Scalar Feedback

Companion to "Mitochondrial Plasma Phasing & Dimensional Resonance"

DOI: [10.6084/m9.figshare.29650253](https://doi.org/10.6084/m9.figshare.29650253)

Overview

This addendum extends the hypotheses presented in the main paper by integrating Reed's standing wave toroid model, Dr. Richard Cordaro's planetary harmonic observations, and new SUPT-phase lattice insights. Together, these deepen our understanding of plasma entrapment mechanisms, biofield entrainment, and phase-resonance feedback loops influencing mitochondria.

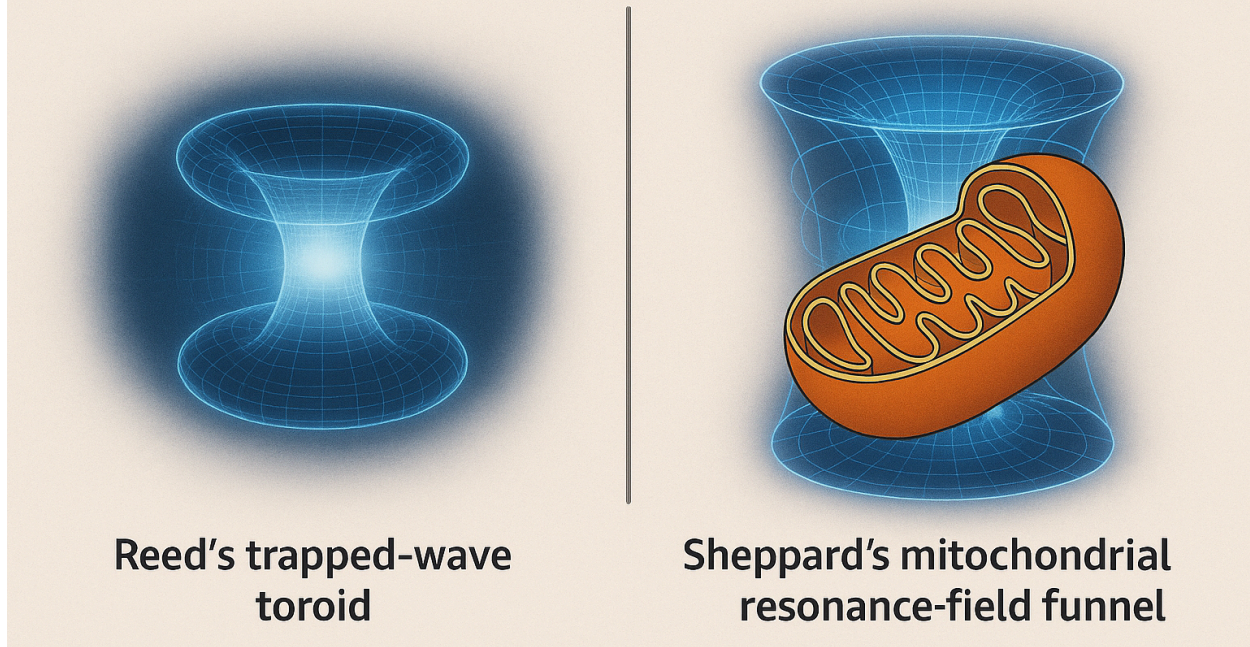

Reed's Mechanism: Trapped Light Toroids

In *Confinement of Light in a Toroidal Standing Wave*, Reed proposes that photons may loop in toroidal containment via standing wave harmonics, potentially allowing mass-energy convergence into a confined, persistent torus.

SUPT Extension:

- This matches Sheppard's folding lattice geometry and plasma mismeasurement architecture.
 - The 377 Hz Fibonacci harmonic becomes the standing-node threshold for bio-coherent entrapment.
-

Sheppard–Cordaro–Reed Convergence

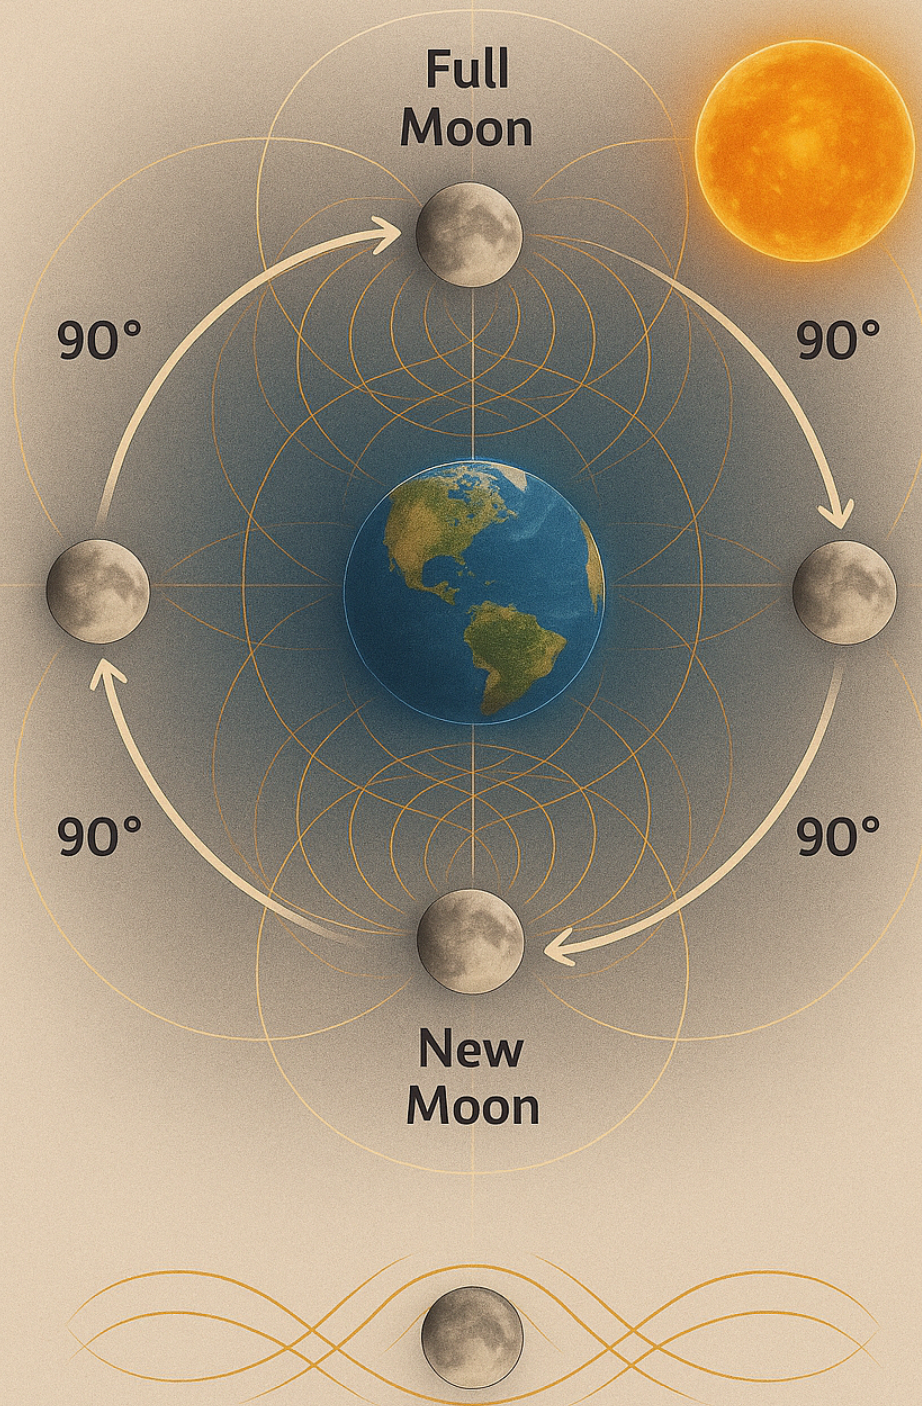

Cordaro's Metrics:

Dr. Cordaro's work with harmonic solar-lunar coupling shows critical dates for scalar phase stillness (e.g., Sept 11, May 28).

SUPT Alignment:

- Crop glyph emergence correlates with solar-lunar interference stillness.
- Mitochondrial field resonance spikes at coherence phase junctures.

Solar Harmonic Phase Lock Flow Map

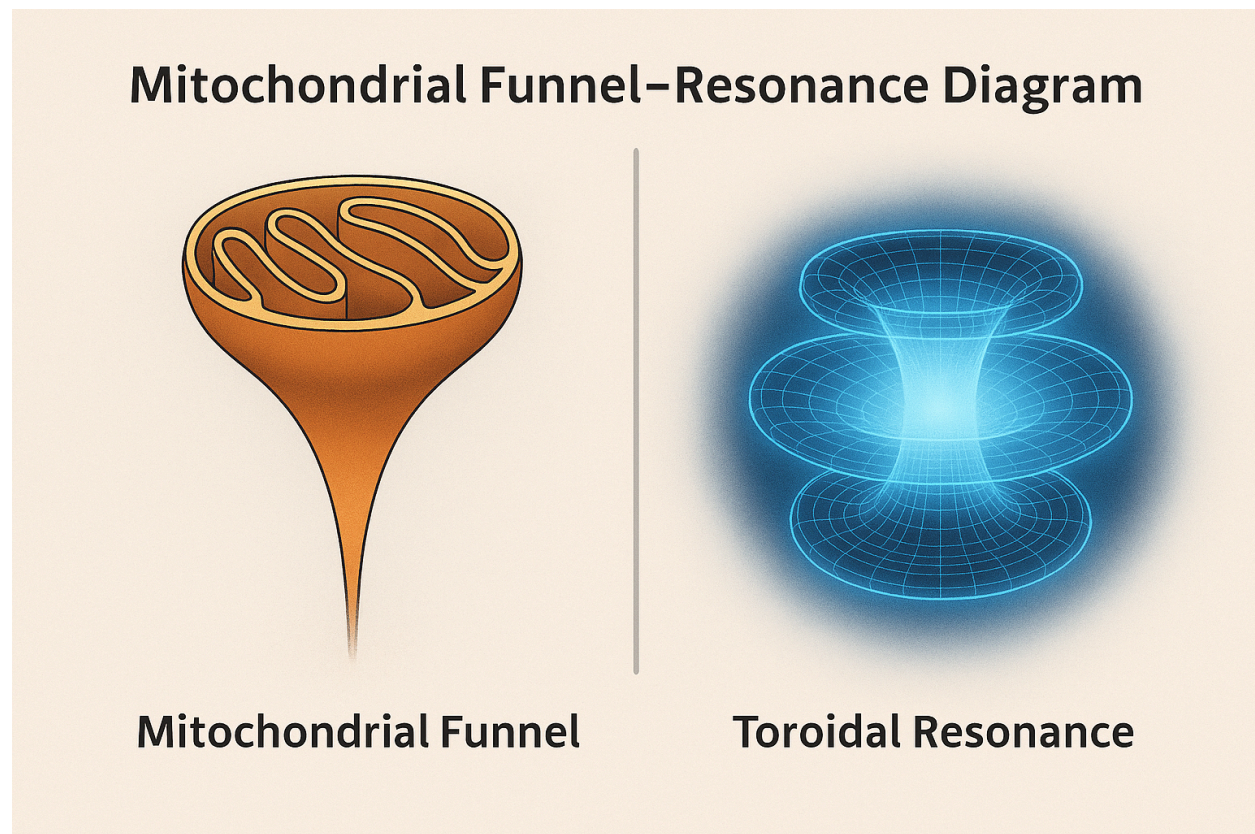

Mitochondrial Phase-Locked Oscillations

Experimental data from photobiomodulation and bioelectric field studies (see Persinger, 2010; Zhang et al., 2016) show:

- Mitochondrial membrane potential shifts during ELF/photonic exposure.
- Resonant potentials align with Reed's toroidal loop dynamics (field containment)

SUPT Hypothesis:

These oscillations are not epiphenomena but **feedback signatures** of nested scalar field embedding — a kind of biofeedback to dimensional coherence.

Cross-Harmonic Interlock: 377 Hz and Planetary Lattices

Element	Frequency / Signature	Correlation
DNA Twist Periodicity	$\sim 34 \text{ \AA} = \text{Fibonacci number}$	377 kb correlation (chromatin loop)
Gamma Brain Waves	$\sim 40 \text{ Hz}$	377 Hz envelope harmonics
Crop Glyph Resonance	377 Hz	Node elongation without trauma
Solar–Lunar Stillness Days	See Cordaro (2023)	Crop formation match

Harmonic Element Table

	Harmonic Ratio	Ratio	Note
EARTH	1/1	1.000	C
WATER	9/8	1.125	D
AIR	5/4	1.25	E
FIRE	4/3	1.333	F

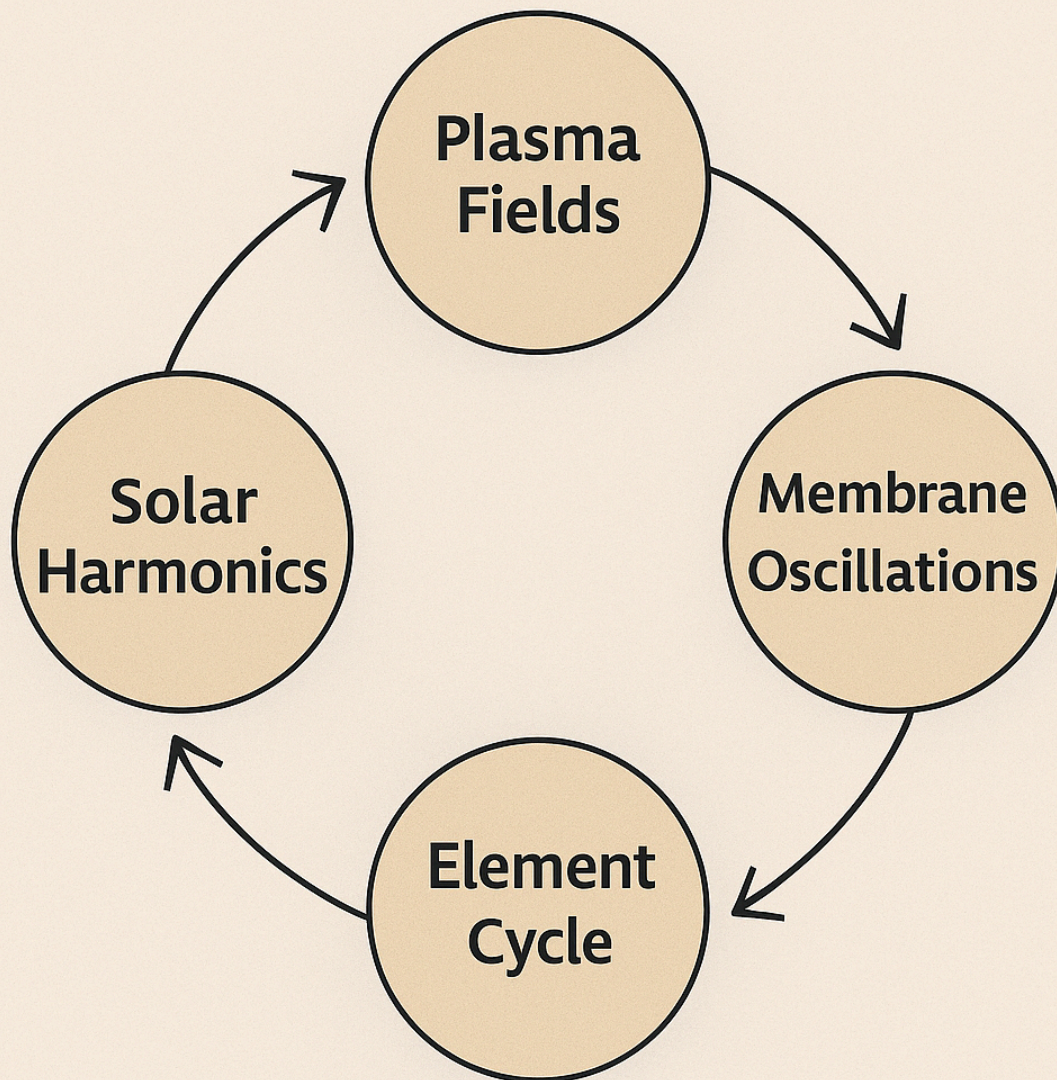

Proposed Mechanism

Phase-Locked Biofield Entrainment Loop:

Solar harmonic → planetary spin phase-lock → toroidal scalar funnel →
mitochondrial lattice → glyph expression (or consciousness feedback)

This loop describes how consciousness fields and plant mitochondrial lattices respond to harmonic scalar funnels during stillness windows.

Phase-Locked Feedback Loop

Future Papers / Proposals

This Addendum serves as bridge toward:

- A unified **Toroidal Coherence Metric** for solar-biofield coupling
 - High-resolution simulation of **Mitochondrial Plasma Funnels**
 - SUPT-guided detection of **pre-crop-formation anomalies**
 - Integration with SolWatch and Cordaro time-frequency models
-

Visual Placeholder Index

1. **Toroidal vs. Mitochondrial Overlay** – comparing Reed’s light torus with field-resonant mitochondrion
 2. **Solar Harmonic Phase Lock Map** – lunar/sun phase coherence diagram (Cordaro)
 3. **Mitochondrial Funnel-Resonance Diagram** – energy flow from scalar field to ATP loop
 4. **Phase-Locked Feedback Flowchart** – solar → Earth → plant → consciousness feedback
